WORK EXPERIENCE

.Net Developer

Centre for Development of Advanced Computing (C-DAC)

07/2025 - Present

Mohali

(C-DAC), is a Scientific Society of the Ministry of Electronics and Information Technology, Government of India

Achievements/Tasks

- Developed and supported ASP.NET MVC applications for RERA Punjab & Delhi, handling regulatory workflows and citizen services.
- Engineered scalable MVC-based backend systems using C# and MySQL, designing complex stored procedures, validations, and transactional workflows to handle high-volume, multi-role data processing.

Full Stack .Net Developer

Autviz Solutions

07/2024 - 07/2025

Mohali

Achievements/Tasks

- As a .NET developer, I specialize in creating and integrating web APIs. I've built APIs and connected them to Angular applications, as well as worked on projects that used the ASP.NET Boilerplate framework.
- Demonstrated excellent problem-solving skills by closely collaborating with cross-functional teams to identify and address challenging technological issues.

Training

CS Infotech Solutions

01/2024 - 06/2024

Chandigarh

Achievements/Tasks

- RESTful APIs were created and designed to improve communication between front-end and back-end elements.
- Third-party APIs were integrated, increasing the capability of the application and the system as a whole. In addition to JWT authentication, third-party APIs were integrated, increasing the capability of the application and the system as a whole.

SKILLS

C/C++

C#

Html/Css

Asp.NetCore

MVC

Restful APIs

Angular

EntityFrameworkCore

Typescript

VisualBasic

ABP

Ms Sql Server, Postgres & MongoDB

RECENT PROJECTS

REAL ESTATE REGULATORY AUTHORITY(RERA) PUNJAB

- Developed and maintained a government regulatory web portal for RERA Punjab and RERA Delhi, enabling online registration, complaint filing, execution applications, and compliance tracking.
- Designed server-side MVC architecture with optimized MySQL stored procedures for large-scale data handling and regulatory reporting.
- Enhanced user experience using AJAX, jQuery, and DataTables with secure, role-based access.

Autsync (2024 - 2025)

- By tracking the money spent by the sales staff on Upwork to secure employment, this website helps the company monitor its revenue. Hubspot is also integrated to continue gaining direct access to leads.
- For a smooth user experience, Angular was used to build the frontend and .NET Core for the backend.

BrainyBoss (2024 - Present)

- The website can be viewed at <https://app.brainyboss.ai/#/account/login>.
- This Voice AI solutions leverage advanced automation to streamline your workflows, save time, and expand your company.
- This website facilitates sales team work because the AI is available around-the-clock to take calls and engage with customers.

Macro's enabled Word Document (09/2024 - 10/2024)

- Used Visual Basic to create unique buttons for particular activities like adding headers and footers, inserting tables, and copying pages.
- Created intuitive popups to update particular document sections.

CERTIFICATES

Certification in Cisco Networking Academy- Cybersecurity Essentials (02/2023 - 02/2023)
